Sentinel[®]

Horse Feeds & Supplements

GUARDIAN OF EQUINE HEALTH®

At Blue Seal®, we know your horse's health is important to you. We've combined decades of experience with the latest research and innovative technologies to continually craft better ways to formulate our Sentinel® products to feed your equine companions.

We're passionate about protecting your horse at every life stage and activity level, so we created **Sentinel® Guardian of Equine Health®**.

DIGESTIVE HEALTH

IMMUNE SUPPORT

WHOLE BODY WELLNESS

Sentinel® – a complete line of 100% extruded, nutrient release formulas made with low-starch and low-sugar ingredients which incorporate built-in fat and fiber. Extrusion of horse feeds is the most technologically advanced method of equine feed processing, offering a safe and natural way to provide multiple nutritional and digestive benefits.

Sentinel® XT™ – a complete line of textured performance feeds with shredded beet pulp which combines low-starch ingredients with fat, fermentable fiber, and extruded nuggets to meet the complex energy demands of performance horses while maintaining normal digestive health.

Sentinel® Care™ – a line of equine diets and supplements scientifically designed with a specific solution in mind to help every horse maintain optimum health.

How We Guard Equine Health

The family of Sentinel horse feeds and supplements are formulated with many features offering nutritional health benefits for your horse. Sentinel 100% Extruded Horse Feeds feature all of the nutritional health benefits listed below. Sentinel XT features all of the below nutritional health benefits except "Healthy Rate of Intake". See Sentinel Care products for specific features.

Stable Digestive Environment – Probiotics and Prebiotics aid in maintaining digestive health and microbial fermentation for sustained nutrient digestibility, absorption and assimilation.

Nutrient Density and Release – A nutrient-dense diet means more nutrition by weight, potentially delivering more of what your horse needs in less feed for ideal health and body condition.

Limited Starch and Sugar – A low starch and sugar diet is often recommended by veterinarians and nutritionists for horses with metabolic and digestive challenges.

Body Tissue & Integrity – Amino acids such as lysine, methionine and threonine are important for growth and maintenance of all tissues including bone, muscle, hoof and hair.

Gastric Balance – Bioavailable marine-sourced calcium helps support gastric pH and health.

Built-In Fiber – Fiber sources such as soybean hulls, beet pulp and alfalfa meal may help maintain healthy hindgut fermentation while providing extra calories in a safe and natural form.

'Cool' Energy – A sequential release of energy from fat and fermentable fiber provides lower starch calories to meet complex energy demands and help maintain normal digestive health.

Healthy Skin and Hair Coat – Sources of omega-3 and omega-6 fatty acids plus protein, B-vitamins and trace mineral complexes may help promote healthy skin, hair coat and hoof condition.

Optimized Nutrition – NutriVantage® for horses incorporates exclusive components that may help aid in nutrient availability and maintenance of a healthy gut environment for immune support.

Immune Support – Antioxidant nutrients including stable vitamins and biologically available trace minerals help maintain normal health and metabolism.

Healthy Rate of Intake – The light and airy nature of 100% extruded feeds may facilitate the breakdown of feed while encouraging slower consumption and more thorough chewing for maintaining digestive health.

Joint Support – Omega-3 fatty acids, stable vitamins and balanced minerals may help maintain joint and bone health and strength.

Sentinel Product Line Overview

Sentinel

EXTRUDED HORSE FEED

We're passionate about protecting your horse's well-being, so we created Sentinel®, a complete line of 100% extruded, nutrient release formula feeds to meet your horse's developmental, physiological and activity requirements.

These nutrient release formula feeds are made with low-starch and low-sugar ingredients and incorporate built-in fat and fiber plus vitamins and minerals. Extrusion of horse feeds is the most technologically advanced method of equine feed processing, offering a safe and natural way to provide multiple nutritional and digestive benefits.

When you select Sentinel, you can be confident that you've made the best feed choice for your equine partner. Our commitment to your horse means providing the most innovative equine nutrition to maintain digestive health, provide immune support and sustain whole body wellness.

DIGESTIVE HEALTH

IMMUNE SUPPORT

WHOLE BODY WELLNESS

gutWise™ Nutrient Release Technology is a proprietary blend of prebiotics, probiotics, marine-sourced calcium, and NutriVantage® for horses to help maintain total digestive health. These components are delivered in an **exclusive extruded form** to help support nutrient digestibility and availability.

STABLE DIGESTIVE ENVIRONMENT

GASTRIC BALANCE

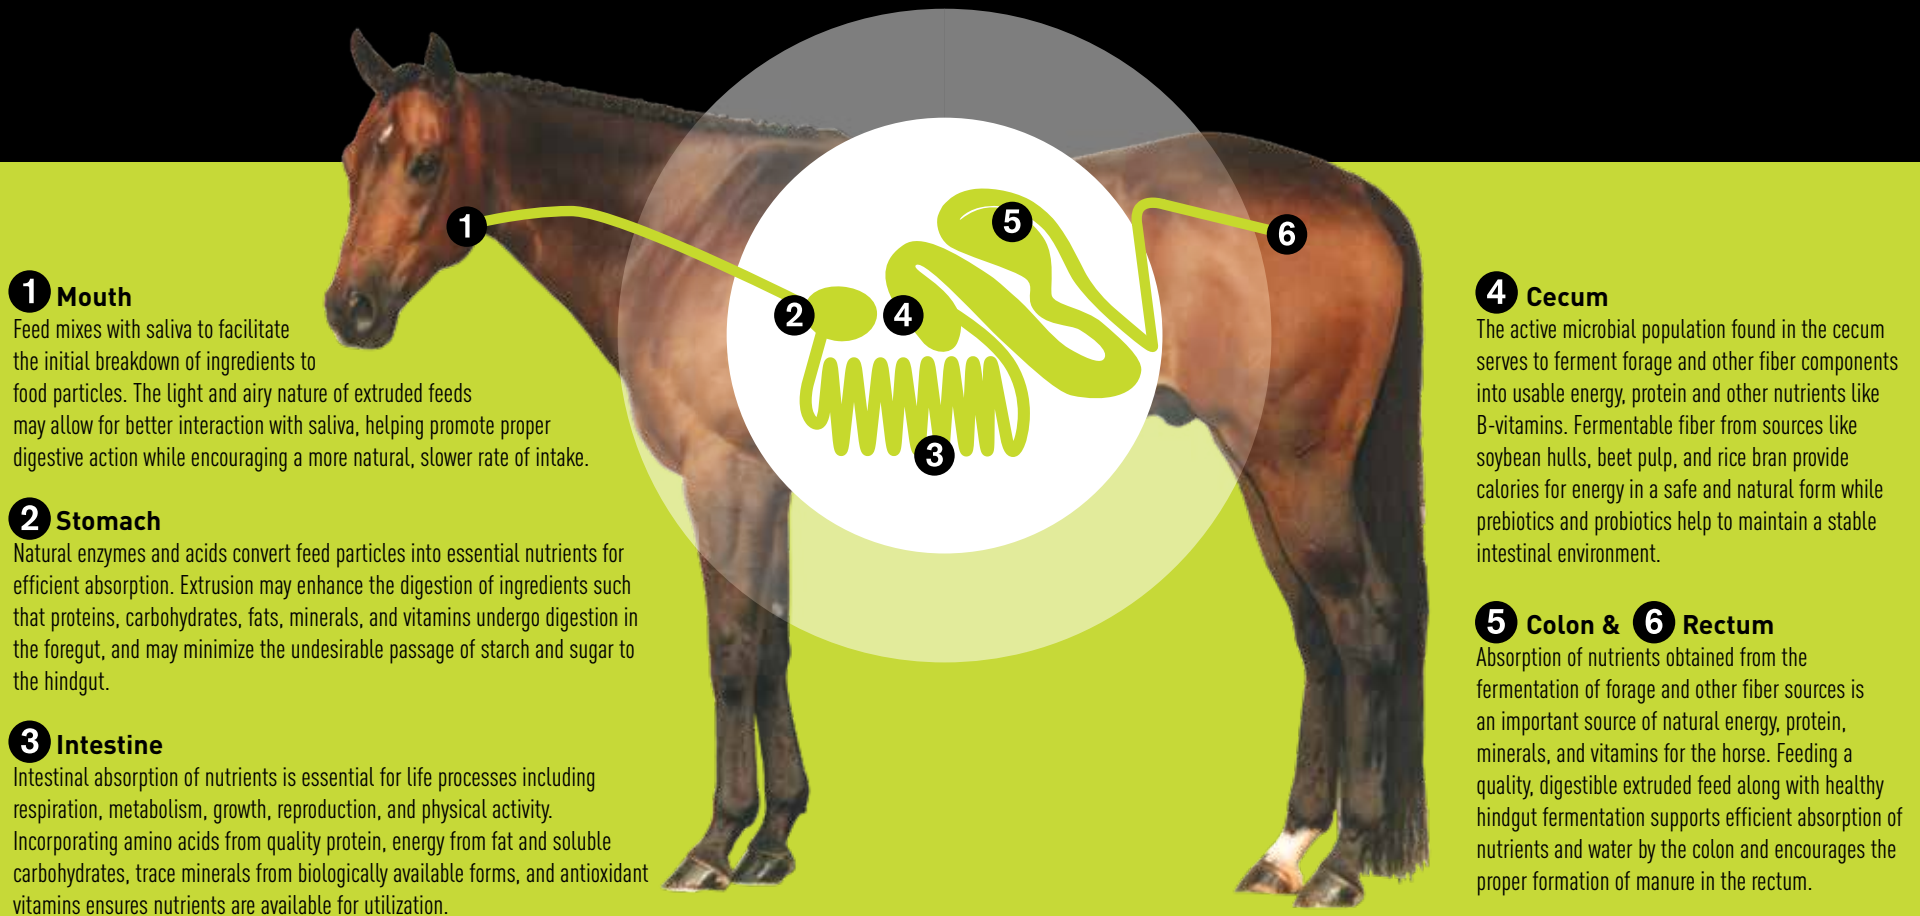

OPTIMIZED NUTRITION

HOW DOES NUTRIENT RELEASE TECHNOLOGY WORK?

Natural ingredients including soybean hulls, beet pulp, rice bran and flaxseed plus vitamins and minerals are extruded forming highly digestible nuggets designed to help release the full nutritional power of these wholesome ingredients.

Extruded feeds are designed for maximum breakdown through enzyme activity that starts as soon as your horse takes its first bite helping to optimize digestibility and nutrient utilization, delivering unmatched nutrition.

1 Mouth

Feed mixes with saliva to facilitate the initial breakdown of ingredients to food particles. The light and airy nature of extruded feeds may allow for better interaction with saliva, helping promote proper digestive action while encouraging a more natural, slower rate of intake.

2 Stomach

Natural enzymes and acids convert feed particles into essential nutrients for efficient absorption. Extrusion may enhance the digestion of ingredients such that proteins, carbohydrates, fats, minerals, and vitamins undergo digestion in the foregut, and may minimize the undesirable passage of starch and sugar to the hindgut.

3 Intestine

Intestinal absorption of nutrients is essential for life processes including respiration, metabolism, growth, reproduction, and physical activity. Incorporating amino acids from quality protein, energy from fat and soluble carbohydrates, trace minerals from biologically available forms, and antioxidant vitamins ensures nutrients are available for utilization.

4 Cecum

The active microbial population found in the cecum serves to ferment forage and other fiber components into usable energy, protein and other nutrients like B-vitamins. Fermentable fiber from sources like soybean hulls, beet pulp, and rice bran provide calories for energy in a safe and natural form while prebiotics and probiotics help to maintain a stable intestinal environment.

5 Colon & 6 Rectum

Absorption of nutrients obtained from the fermentation of forage and other fiber sources is an important source of natural energy, protein, minerals, and vitamins for the horse. Feeding a quality, digestible extruded feed along with healthy hindgut fermentation supports efficient absorption of nutrients and water by the colon and encourages the proper formation of manure in the rectum.

EXCLUSIVELY FORMULATED WITH **gut Wise** NUTRIENT RELEASE TECHNOLOGY

Sentinel® Performance LS

A nutrient release formula feed for equine athletes competing in a variety of disciplines as well as horses with elevated caloric requirements including hard keepers and rescue horses.

Sentinel Performance LS is a low-starch and low-sugar feed with a high level of fat and fiber. This unique formula is also recommended for certain horses where maintenance of digestive and metabolic health is a challenge.

Crude Protein, min	12.0%
Crude Fat, min	12.0%
Crude Fiber, max	20.0%

Sentinel® Lifetime

A nutrient release formula feed for junior, adult and senior horses to support a lifetime of health and performance. Sentinel LifeTime is a high-fat and high-fiber feed fortified with essential nutrients plus Glucosamine HCl and Chondroitin Sulfate to help support joint health. This unique formula is also recommended for certain horses where maintenance of digestive and metabolic health is a challenge.

Crude Protein, min	13.5%
Crude Fat, min	10.0%
Crude Fiber, max	20.0%

Sentinel® Simply Lite

A nutrient release formula feed for adult horses requiring a restricted calorie diet or reduced feeding rate to maintain a healthy body condition.

Sentinel Simply Lite is a balanced and concentrated feed with lower fat for easy keepers, ponies and miniature horses that do not need additional calories for maintenance. This unique formula may also be fed to certain horses where maintenance of digestive and metabolic health is a challenge.

Crude Protein, min	13.0%
Crude Fat, min	3.5%
Crude Fiber, max	17.5%

Sentinel® Grow & Excel

A nutrient release formula feed for growing, breeding and performance horses. Sentinel Grow & Excel combines a precise balance of protein, high-fat and high-fiber with low-starch and low-sugar ingredients providing healthful nutrition throughout growth and into performance. This versatile formula is also an ideal choice for breeding stallions and pregnant mares in late gestation.

Crude Protein, min	14.0%
Crude Fat, min	10.0%
Crude Fiber, max	15.0%

Sentinel® Active Senior

A nutrient release formula feed for active senior horses. Sentinel Active Senior is a high-fat, high-fiber feed containing a fortified balance of nutrients and an exclusive blend of natural additives to meet the increased demands of active senior horses, senior horses requiring additional body condition or hard keepers and performance horses fed lower protein hay. This unique formula is also recommended for certain horses where maintenance of digestive and metabolic health is a challenge.

Crude Protein, min 14.0%
Crude Fat, min 12.0%
Crude Fiber, max 16.0%

Sentinel® Safe Start

A nutrient release formula feed for growing foals and lactating mares. Sentinel Safe Start is a highly fortified high-protein and high-fat feed providing the precise nutrition to support healthy foal growth and milk production and composition in mares. This unique formula is also recommended for show horses where muscle mass, topline and coat condition are desired.

Crude Protein, min 16.0%
Crude Fat, min 8.5%
Crude Fiber, max 12.0%

Sentinel® Senior

A nutrient release formula feed for senior horses, horses with poor teeth and prematurely aging horses. Sentinel Senior provides a highly fortified balance of nutrients and an exclusive blend of natural additives to meet the increased nutritional demands of senior horses due to less efficient digestive and metabolic systems. This unique formula is also recommended for certain horses where maintenance of digestive and metabolic health is a challenge.

Crude Protein, min 14.5%
Crude Fat, min 5.5%
Crude Fiber, max 17.0%

^fApproximate feed weight to volume. For accuracy, weigh feed.

^aSome good quality hay should be offered to help maintain good digestive function and prevent boredom.

^bAmount to be fed on daily basis rather than per 100 pound of body weight per day.

^cHigher feeding rate for diets with minimal hay. Some good quality hay should be offered to help maintain good digestive function and prevent boredom.

The suggested feeding program is intended solely as a guide. Adjust the feeding of Sentinel extruded horse feeds according to individual needs and condition of the horse. The variables of management, environment, and breed may dictate changes in the horse's dietary requirements. Provide good-quality hay or pasture, free-choice salt and plenty of fresh water.

Suggested feeding program is based on offering grass or mixed grass hays. If feeding legume hays, rich pasture, or if Sentinel extruded horse feed is fed below recommended feeding range, consult your Kent Nutrition Group sales representative or customer service for a ration recommendation.

GUARDIAN OF EQUINE HEALTH®

Sentinel[®] XT™

TEXTURED HORSE FEED

We're passionate about protecting your horse's well-being, so we created Sentinel[®] XT™, a complete line of textured performance feeds with shredded beet pulp to meet your horse's developmental, physiological and activity requirements.

These specialized textured feeds combine low-starch ingredients with fat, fermentable fiber and exclusive extruded nuggets designed for sequential release of calories to meet the complex energy demands of performance horses while maintaining normal digestive health.

When you select Sentinel XT, you can be confident that you've made the best feed choice for your equine partner. Our commitment to your horse means providing performance equine nutrition to maintain digestive health, provide immune support and sustain whole body wellness.

gutWise™ Technology is a proprietary blend of prebiotics, probiotics, marine-sourced calcium, and NutriVantage® for horses to help maintain total digestive health. These components are delivered in a **beet-pulp textured feed with exclusive extruded nuggets.**

*Approximate feed weight to volume. For accuracy, weigh feed.

Sentinel Care Carb-Guard is a low protein, high fat pellet formulated with a low level of starch and sugar for mature horses at all levels of activity or performance. Sentinel Care Carb-Guard may also be fed to horses when a low starch and sugar diet is recommended for maintenance of digestive and metabolic health – consult with an equine nutritionist for a recommended diet.

The suggested feeding program is intended solely as a guide. Adjust the feeding of Sentinel Care Carb-Guard according to individual needs and condition of the horse. The variables of management, environment, and breed may dictate changes in the horse's dietary requirements.

Provide good-quality hay or pasture, free-choice salt and plenty of fresh water.

Suggested feeding program is based on offering grass or mixed grass hays. If feeding legume hays, rich pasture, or if Sentinel Care Carb-Guard is fed below recommended feeding range, consult your Kent Nutrition Group sales representative or customer service for a ration recommendation.

How We Guard Equine Health

Low Sugar & Starch diets are often recommended by veterinarians and nutritionists for horses with metabolic and digestive challenges.

Cool Calories from a blend of fat sources helps to maintain body condition and performance.

Built-In Fiber helps maintain healthy hindgut fermentation while providing extra calories in a safe and natural form.

Vitamin E & Selenium provide antioxidant benefits supporting immune health.

Nutritionally Balanced with optimum levels and ratios of nutrients help support and maintain overall health.

Sentinel® Care™ Gastric Support
 An equine solutions supplement designed to maintain a healthy gastro-intestinal environment in all horses especially during times of stress. It is scientifically formulated with an exclusive blend of gastric support ingredients including bioavailable marine-sourced calcium and NutriVantage® for horses in a palatable, pelleted form.

- Crude Protein, min** 13.0%
- Crude Fat, min** 2.0%
- Crude Fiber, max** 17.0%

Suggested Feeding Recommendations

Sentinel Care Gastric Support		
Horse Weight, lbs	Grams/Feeding	Cups*/Feeding
500 – 750	75	0.50
750 – 1,000	113	0.75
1,000 – 1,250	150	1.00
1,250 – 1,500	188	1.25
1,500 – 1,750	225	1.50
For Maintenance: Feed amount shown 3 times per day		
For Stress Conditions: Feed amount shown 4 times per day		

*Standard kitchen 8 oz. measuring cup.

Sentinel Care Gastric Support supplement is designed to be fed as a top dress to the horse's daily ration in 3 to 4 feedings per day. Follow feeding guidelines in chart and feed the amount shown 3 times per day for maintenance or 4 times per day for horses under stress.

For example, feeding rate for an 1100-lb horse is 150 grams or 1 cup to be fed 3 times per day for maintenance or 4 times per day if under stress.

For best results, feed Sentinel Care Gastric Support supplement along with appropriate Blue Seal® horse feed at recommended rates. Provide good-quality hay or pasture, free-choice salt and plenty of clean, fresh water daily.

How We Guard Equine Health

Bioavailable Calcium & Magnesium from a natural marine algae source helps support normal gastric pH and health.

Butyrate & Zinc provide nutritional support for the gastro-intestinal mucosa helping to maintain gut tissue integrity and normal nutrient absorption.

Prebiotics nourish and encourage the health promoting activities of beneficial bacteria in the gut, maintaining digestive health and microbial fermentation for sustained nutrient digestibility and absorption.

Probiotics supply beneficial micro-organisms to support normal digestion and fermentation in the digestive tract.

NutriVantage® for horses incorporates exclusive components that may help aid in nutrient availability and maintenance of a healthy gut environment for immune support.

Sentinel® Care™ Omegatin®

An equine solutions supplement designed to provide additional calories to all classes of horses including maintenance, breeding, growing and performance. It incorporates a blend of high-fat ingredients which provide low starch calories to help maintain body condition without increasing the grain ration. Sentinel Care Omegatin is a balanced supplement providing all nutrients including amino acids, omega fatty acids, minerals, and vitamins in an exclusive extruded nugget.

- Crude Protein, min** 15.0%
- Crude Fat, min** 20.0%
- Crude Fiber, max** 12.0%

Suggested Feeding Recommendations

Sentinel Care Omegatin lb/horse/day
0.5 – 4.0 lb/day

*Approximate feed weight to volume: 0.85 lb = 1 quart. For accuracy, weigh feed.

Provide supplemental grain ration as needed along with good quality hay or pasture. Provide clean water and salt free-choice. Do not exceed 0.3 ppm Selenium in total diet.

The suggested feeding program is intended solely as a guide. Adjust the feeding of Sentinel Care Omegatin according to individual needs and condition of the horse. The variables of management, environment, and breed may dictate changes in the horse's dietary requirements.

How We Guard Equine Health

20% Fat in an extruded nugget provides a nutrient dense source of calories in an easy to feed form.

Low Starch & Sugar diets are often recommended by veterinarians and nutritionists for horses with metabolic and digestive challenges.

Cool Calories from a blend of fat sources including flaxseed, rice bran and soybean oil helps to maintain body condition and performance.

Omega 3 and Omega 6 Fatty Acids support skin and hair coat health and aid in reducing the effects of stress.

Nutritionally Balanced with protein, minerals and vitamins to help maintain nutrient ratios during supplementation.

Built-In Fiber helps maintain healthy hindgut fermentation while providing extra calories in a safe and natural form.

Vitamin E & Selenium provide antioxidant benefits supporting immune health.

Healthy Rate of Intake - The light and airy nature of extruded nuggets may facilitate the breakdown of feed while encouraging slower consumption and more thorough chewing for maintaining digestive health.

**Sentinel® Care™ Equine Choice®
 Topline 30**

An equine solutions ration balancer designed to provide protein, minerals and vitamins to balance forages or supplement feed for all classes of horses. This pelleted supplement can be fed alone with forage or as a top-dress with other feed products. Ideal for horses not requiring extra calories from grain including easy keepers, ponies and miniatures. It is used to supplement horses fed below the suggested minimum of a feed product and to horses requiring additional amino acids, minerals and vitamins such as breeding and draft horses.

- Crude Protein, min** **30.0%**
- Crude Fat, min** **5.0%**
- Crude Fiber, max** **7.0%**

How We Guard Equine Health

-  **Concentrated Nutrition** - A nutrient dense diet provides concentrated nutrition allowing for a reduced feeding rate which minimizes starch and sugar intake.
-  **Topline Support** - Essential amino acids are important for growth and rebuilding of muscle for optimal topline.
-  **Immune Health** - Vitamin E and Selenium provide antioxidant benefits supporting immune health.
-  **Healthy Skin & Hair Coat** - Protein, vitamins, Omega-3 fatty acids and biologically available trace mineral complexes help maintain healthy skin, hair coat and hoof condition.
-  **Stable Digestive Environment** - Probiotics and Prebiotics aid in maintaining digestive health and microbial fermentation for sustained nutrient digestibility, absorption and assimilation.

Suggested Feeding Recommendations

Sentinel Care Equine Choice Topline 30 (1.35 lb = approx. 1 quart*)				
Horse Class	Standard 1,100 lb BW	Draft 1,980 lb BW	Pony 440 lb BW	Miniature 250 lb BW
Balancing Pasture or Hay Only (Limited or No Additional Feed), lb/horse/day				
Growth: 18 Months to 2 Years	0.75 – 1.00	1.50 – 1.75	0.33 – 0.50	0.20 – 0.33
Maintenance to Light Activity; Early Pregnancy; Stallions	1.00 – 1.25	1.50 – 1.75	0.50 – 0.66	0.25 – 0.45
Moderate to Heavy Activity; Late Pregnancy	1.25 – 1.50	1.75 – 2.00	0.50 – 0.75	0.25 – 0.50
Very Heavy Activity; Special Circumstances	1.50 – 1.75	2.00 – 2.25		
Supplemental to Daily Feed Ration (Feed Fed Below Min. Recommended)	0.25 – 0.75	1.00 – 1.50		

*Approximate feed weight to volume. One level cup (8 oz) holds approximately 1/3 lb (0.33 lb). For accuracy, weigh feed.

Sentinel Care Equine Choice Topline 30 is an equine ration balancer designed to be fed alone with forage or as a top-dress with other feed products to provide essential amino acids, minerals and vitamins to horses of all classes and sizes including ponies, miniatures and drafts. It is an ideal choice for horses not requiring extra calories from grain such as easy-keepers or those horses being fed rations below the recommended minimum feeding level.

The suggested feeding program is intended solely as a guide. Adjust the feeding of Sentinel Care Equine Choice Topline 30 according to individual needs and condition of the horse. The variables of management, environment and breed may dictate changes in the horse's dietary requirements. Provide good-quality hay or pasture, free-choice salt and plenty of fresh water. Suggested feeding program is based on offering grass or mixed grass hays. If feeding legume hays, rich pasture, consult your Kent Nutrition Group sales representative or customer service for a ration recommendation.
