EQUILOX INTERNATIONAL INC.

Equilox International Inc. specializes in equine horse hoof adhesives. Developed in 1988 after many trials and extensive research at leading universities and equine centers throughout the U.S., the Equilox Adhesive Hoof Repair System was originally used to treat competitive horses. Now, Equilox Adhesive is used by farriers, equine centers, and horse owners – as well as various zoo and wildlife centers – throughout the world.

Featured Products for 2019

- ◆ **Equilox I Slower Setting Adhesive...**extremely strong resin that can be used for anything from repairing small quarter cracks to reconstructing an entire hoof wall, yet flexible enough for easy filing, shaping, and even nailing. Sets in 6-8 minutes.
- ◆ **Equilox II Faster Setting Adhesive...** has the same properties as our Equilox I formula, but a faster cure time for colder weather. Sets in 4-6 minutes.
- ◆ **Equilox 4:1 Deep Penetrating Adhesive...** has the same properties as our Equilox I formula, but a 4 to 1 mix ratio for deeper penetration to fill holes.
- ◆ **Equilox I Medicated Adhesive Hoof Repair System...** developed specifically to treat infections found in the hoof, and has all the same properties as our Equilox I Slower Setting Formula Adhesive
