BENEFITS & PROPERTIES

Antimicrobial

Our alloy horseshoes have antimicrobial properties certified by the EPA (U.S. Environmental Protection Agency) and proven antibacterial action against *Escherichia coli* ATCC 25922 and *Staphylococcus aureus* ATCC 25923 proven by studies at INTA (Institute of Nutrition and Food Technology certified by the University of Chile) under ISO 22196:2007. done in 2015.

EPA approved the registrations of copper alloys who have public health benefits, with no less than 60% to be considered efficient, Our copper alloy horseshoes contains over 80% copper alloy therefore killing more than 99.9% of disease causing bacteria within just two hours of contact and proven to continuously kill the bacteria that cause infections.

Effects never wears out

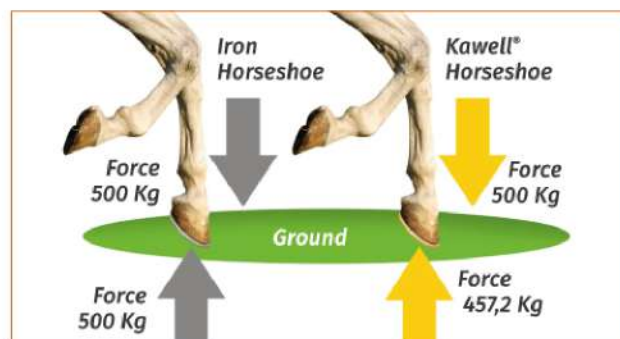

- Continuous and ongoing antimicrobial action
- Remains effective even after repeated wet & dry abrasion and re-contamination
- Natural tarnishing does not impair efficiency

Toe wear at 2nd reset, 13 weeks

Shock Absorption

Studies at the University of Santiago of Chile (USACH) show that by using Kawell Alloy Horseshoes, the reaction force decreases by 8.56%, thus transmitting lower power to the equine limb. The energy transmissions is less harmful on bones, joints, tendons and ligaments compared to iron horseshoes.

The law of action and reaction, third Newton's law says that if an object A exerts a force F against an object B, object B exerts the same force F against A.

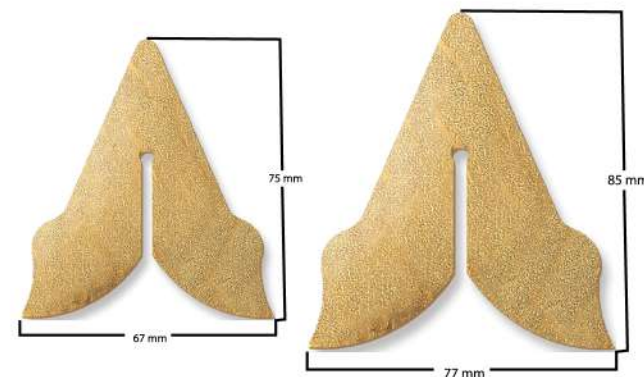

Helps with:

- White Line Disease
- Seedy Toe
- Thrush

Safe to use

- Not harmful to people or the environment
- Inherently antimicrobial, no chemicals added
- Completely recyclable

Kawell® COPPER ALLOY INSERTS

Kawell® Copper Alloy Inserts for the frog of a hoof are crafted with only the finest copper alloy.

This innovative product is designed to give horses a better quality of life by killing bacteria and fungus on contact and preventing the proliferation of these microorganisms in the frogs of a hoof.

Our inserts can be welded or brazed onto ANY shoe, combining perfectly with our copper alloy horseshoes, and/or bar stock.
