Purchase

More about the HERO

The HERO PEMF Device is a Wellness Lifestyle consumer product designed to be used as part of a Wellness Lifestyle for humans, horses, bovines and pets. The HERO generates pulsed magnetic fields creating micro-currents of electricity that work with the body's natural electricity for general health and well-being. The HERO is designed to be used Independently but can also be used in conjunction with any Magnus Magnetica PEMF Device. With proper care, your HERO should provide you many years of trouble-free use. Please understand that results will vary.

HERO PEMF Technology is designed for hyper-targeted applications on both humans and animals. When an area of the body requires a highly focused PEMF signal, the use of a traditional PEMF loop application becomes unwieldy, since the area the loop covers may be too large.

While all our PEMF models are versatile devices that can be applied for a variety of medical indications, the HERO provides an economical, high-powered device option to meet the varied needs of buyers.

HERO PEMF Devices are manufactured with high-quality parts and components designed to last. Magnus Magnetica, LLC warrants that its products will be free from defects in materials and workmanship under normal use and in accordance with appropriate handling.

HERO PEMF devices are covered by both a Limited and Extended limited warranty. Terms and conditions can be found at www.magnusmagnetica.com/warranty.
